**Name:** Simon Huellenkremer  
**Age:** 17

**Nationality:** German

**Studying:** 2016 Level 2 English, Outdoor Education, Mathematics,  
Technology Metal & Music Contemporary  
2017 Level 3 Technology Wood, Technology Mechanical  
Engineering, Technology Skills, Outdoor Education & Calculus

**Goal:** To improve my English and have many new experiences.

**1) Why did you choose New Zealand to study?**

Because it is an English speaking country and I heard many good things about New Zealand.

**2) What is the best thing about studying at Otumoetai College?**

The best thing is being able to choose and experience practical subjects. I have studied Technology Wood and Metal, Mechanical Engineering and Technology Skills, which enabled me to build a Blue Tooth Speaker. I have also been part of the Outdoor Education class, which has included amazing camps and day trips.

**3) What do you enjoy most about being in New Zealand?**

The nature and being active.

**4) Do you enjoy living with a New Zealand homestay family?**

Yes because we really understood each other. My host mum likes to be active in the outdoors and together we have visited Northland, Auckland and Napier.

**5) What would you say to a student from your country considering coming to New Zealand to study?**

I would tell them they will have the best experience and that they must take Outdoor Education as a subject.

**6) What are your career aspirations?**

I would like to become a Mechanical Engineer.

**7) What do you plan to do after your New Zealand education is complete?**

I will finish my education in Germany and then travel around Europe. I will then study Mechanical Engineering at University.
